

STARX FLOW MASTERCLASS

The Ultimate 24/7 AI Receptionist Setup Masterclass

A step-by-step playbook to integrate your scheduling calendar, calibrate customer FAQs, and scale front-desk booking capacity.

Phase 1: Pre-requisites & Calendar Hook

01

Dedicated Line

Secure a clean WhatsApp Business number. Back up chat logs if converting an active line.

02

Calendar Sync

Connect Google Calendar, Outlook, Square POS, or Clover natively in the Dashboard.

03

Roster Definition

Define active staff, shifts, active days, service pricing, and appointment buffers.

04

Double-Booking Safe

Configure 2-way sync to lock slots instantly and prevent overlapping sessions.

Phase 2: Building the AI Knowledge Base

Identity & Voice

- Match business name/locations
- Calibrate brand tone (warm/professional)
- Adopt native localized greetings

Core FAQ Mapping

- Cancellation & refund policies
- Parking, building access guidelines
- Service specifications & upgrades

Live Staff Triage

- Define handover triggers
 - Keywords: "emergency", "complaint"
 - Live desktop sound alerts
-

Phase 3: Integration Testing & Launch

Go-Live Playbook Checklist

Follow these final checks to ensure flawless automation and customer service.

- Dry-Run Testing: Send test texts on WhatsApp to book slots, ask for pricing, and request changes.
- Waiver Integrations: Confirm that WhatsApp waivers or Stripe deposits display cleanly inside the chat flow.
- Staff Escalation Hook: Ensure active front-desk staff can see active chats in the StarX Admin Hub.
- Autopilot Activation: Switch the AI Assistant toggle to Live, put up the WhatsApp business link, and watch bookings scale.
